ZIAM JAN

OBJECTIVE

An organized and self-motivated computer science student with a head strong passion for the software industry. My goal is to obtain a summer internship where I may develop data analysis and computer programming skills to gain industry experience.

EDUCATION

State College, PA   **Pennsylvania State University**   **August 2018 – May 2022**
- **Major:** Computer Science, B.S. **GPA: 3.67**
- **Minor:** Mathematics
- Undergraduate Coursework: Operating Systems; Databases; Algorithms; Programming Languages; Discrete Math; Calculus III

EXPERIENCE

Robert Half   **IT Deployment Tech. Contractor**   **July 2019 – Present**
PFM, Harrisburg, PA (July 2019 – August 2019)
- Reduced time of shipping out employee laptops by 2 days through distribution of simple task between me and my co-workers
- Improved efficiency of laptops imaging and deployment by incorporating the PDQ software deployment tool
- Identified an imaging solution which led to a 15% increase in overall deployment time in various IT equipment
- Aided compliance sector with HTML code for their websites
- Leveraged knowledge in the PDQ software tool and Lansweeper

LEADERSHIP/INVOLVEMENT

Science Olympiad (Team Captain)
- Spearheaded a team of 10 to a PA Regional Science Olympiad Competition
- Developed projects in various disciplines: engineering, chemistry, biology, web development, and robotics
- Overall we achieved 10th place out of 66 schools in the region

PSU Association for Computing Machinery
- Obtained and developed skills in various computing languages such as Python and C++

Model United Nations (Club Officer)
- Learned valuable negation skills
- Collaboratively worked to persuade the committee to support our cause

Making Strides Against Breast Cancer (2015 – 2016)
- Helped raise awareness and money for Breast Cancer patients

PERSONAL PROJECTS

Personal Website: ziamjan.github.io
- Implemented CSS3 and HTML5 to create a portfolio to store various future side projects

Tic-Tac-Toe
- Developed a Person vs. Person version of the game
- Utilized basic python methods (loops, Booleans, variables, etc.)

Languages & Programs
- C++; Python; HTML5; CSS3
- Visual Studio; Visual Studio Code; Solidworks, lansweeper
